City: Craiova
Country: Romania

Technologies used: Java, JavaScript, WebDriverIO, Cucumber, Allure
Other: Jira, Azure DevOps, Git, Ansible and Octopus

- Conducted bot automation and manual testing to enhance efficiency and accuracy of testing processes.
- Performed manual testing, including test case design, execution, and defect identification.
- Developed comprehensive testing frameworks, including component, integration, and end-to-end tests.
- Actively participated in code reviews and provided feedback on automation scripts developed by team members.
- Assisted in the identification and implementation of test automation frameworks, optimizing testing efficiency.
- Successfully created automation test projects from scratch, developed automation test suites for component and end-to-end testing, and created a common testing framework used at the project level.
- Conducted exploratory testing as part of functional testing, including integration, regression, smoke testing, and sanity testing.
- Collaborated effectively with developers and business analysts to ensure alignment with project requirements and validate software functionality.
- Generated comprehensive reports and documentation to facilitate clear communication of test outcomes

Junior .NET Developer
Star Storage [14/08/2021 – 14/11/2021]

Address: 2 Pietii Street, 3- 4th Floor, 200540 Craiova (Romania)
City: Craiova
Country: Romania
Website: https://star-storage.ro/
Link: https://github.com/Faludya/BankApplication

During my 3-month internship as a .NET Junior Developer, I gained valuable experience in both performance optimization and independent application development.

- Assisted in analyzing and optimizing the performance of the admin side of an application.
- Independently developed a desktop application—an ATM/bank system—using .NET, WPF, and WCF.
- Leveraged Telerik components to enhance the user interface and improve the overall user experience.
